Summary

Full-stack developer skilled in HTML, CSS, JavaScript, React, and Firebase. Experience building responsive dashboards, REST APIs, and real-time applications. Passionate about performance optimization and scalable web solutions.

Projects

Market Pulse Trading Platform (Github)

- Coded a cryptocurrency and forex trading dashboard featuring interactive candlestick charts with 15+ technical indicators, real-time price updates via WebSocket connections refreshing every 2 seconds, and comprehensive paper trading functionality; tested over 1,000 simulated trades across 20+ cryptocurrencies using $100,000 virtual funds.
- Built with vanilla HTML, CSS, and JavaScript achieving 95+ performance score, reducing load times by 40% through framework-free deployment, enabling seamless customization while maintaining professional functionality across desktop, tablet, and mobile devices.

Sahayak AI – AI Classroom Assistant (Vercel)

- Developed responsive dashboards using React.js and Tailwind CSS for a trial-phase EdTech platform supporting 500+ students across Classes 6–8 and 3–4 subjects, featuring AI-automated lesson scheduling capable of generating 100+ worksheets weekly and evaluating up to 1000+ assignments monthly.
- Integrated RESTful APIs via AWS API Gateway designed to handle 5000+ requests daily, enabling S3 file uploads (50MB+ documents) and real-time status updates for AI-generated educational materials.
- Implemented Firebase Authentication with role-based access control for 2 user roles (teacher, student) and JWT validation securing 20+ protected API endpoints.
- Built file upload interfaces supporting 10+ file formats and performance analytics dashboards tracking 50+ metrics, including student progress, engagement rates, and learning outcomes for Classes 6–8 across 3–4 subjects.

Education

Sunbeam School Lahartara (84.6%) — Secondary Education(2019-2021)
Crimson World School (80%) — Higher Secondary Education (2021-2023)
Vellore Institute Of Technology, Bhopal — B-Tech CSE-Core (2023-Present)

Skills

- **Frontend:** HTML, CSS, JavaScript, TypeScript, React.js, Responsive Design,
- **Backend & APIs:** REST API integration, Authentication (Firebase), MySQL basics
- **Languages:** Python, Java
- **Programming & Tools:** Git, Github, Excel, R
- **Other:** Debugging & Testing, Prompt Engineering with ChatGPT, Communication, Problem Solving
